

## BUSINESS PACKAGE

# Västerås

### Scope

- 410 km overhead power line 400 kV
- 330 km dismantling of overhead power line 220 kV

The business package is aiming to meet the rising demand by reinforcing the national grid and replacing parts which are approaching the end of its technical lifespan. The package will contribute to a more flexible and robust national grid simultaneously as addressing the need for increased transmission capacity from north to south.

### **Timeline**

- Procurement of business package publish Q3 2025
- Award of business package Q1 2026
- Phase 1 First project agreement Q2 2026
- Establishment of first contract Q1 2027
- Additional projects will be initiated continuously
- Execution time 8 years
