

Explore your possibilities

If you are unsure of what you can offer or have questions on the process of becoming a provider, contact one of our e-mails: fcr@svk.se, afrr@svk.se and mfrr@svk.se.

Requirements on balance responsibility

In order to provide FCR, aFRR and mFRR you must cooperate with a balance responsible party (BRP). The BRP has the final responsibility in the application process and for the delivery of ancillary services.

Perform a prequalification test

The resource that will deliver the ancillary service must prove it fulfills the technical requirements set out for the specific ancillary service. This is done by performing different pre-qualification tests.

Establish and test electronic communication with Svenska kraftnät

Communication must be established with Svenska kraftnät in order to facilitate reporting of real-time measurement values as well as for bids and bid-clearances. The electronic communication will be tested.

Planning and submitting the first bid

Before submitting your first bid, you must plan a date together with Svenska kraftnät and exchange contact information.
