

- 
- **Explore your possibilities**

If you are unsure of what you can offer or have questions on the process of becoming a provider, contact one of our e-mails: fcr@svk.se, afrr@svk.se and mfrr@svk.se.
 - **1** **BSP requirement**

In order to provide FCR, aFRR and mFRR you must cooperate with a BSP alternatively be or become a BSP yourself. The BSP has the final responsibility in the application process and for the delivery of ancillary services.
 - **2** **Perform a prequalification test**

The resource that will deliver the ancillary service must prove it fulfills the technical requirements set out for the specific ancillary service. This is done by performing different prequalification tests.
 - **3** **Establish and test electronic communication with Svenska kraftnät**

Communication must be established with Svenska kraftnät in order to facilitate reporting of real-time measurement values as well as for bids and bid-clearances. The electronic communication will be tested.
 - **4** **Sign BSP-agreement (if relevant)**

If you plan to become a BSP in order to be able to supply ancillary services directly to Svenska kraftnät, a BSP agreement must be signed. In order to become a BSP you also need to be BRP in the delivery point you intend to use to.
 - **5** **Plan and submit the first bid**

Before submitting your first bid, you must plan a date together with Svenska kraftnät and exchange contact information.
